

LV

Customer Name _____

Canopy type/size _____

The flight line of Apex BASE LV canopies are built using the same air foil and trim as the tested, proven, and trusted FLiK and FOX BASE specific parachutes. We have re-configured tapes and line to reduce pack volume and weight while maintaining the structural integrity required on a single parachute BASE system. The LV has the same great flight performance, but is now less filling.

Performance Options	Vtec	1/7	Vent Technology with Cover for slider up	115
