## THIS WOLF STANDS ALONE

### Redefining BASE Parachutes

While other companies have been content to refine BASE parachute technology, Apex BASE has redefined what is possible. The Lobo, which represents the most significant advancement in BASE canopies since the launch of the FOX, is the result of six intensive years of research and development, testing, and refinements that set a new standard in the world of BASE.

The Lobo is a game-changer. It's your turn to play.

### LOBO FEATURES »

- + Ultralite fabric
- + Vtec (3 of 7 vents)
- + Mesh slider
- + Dual brake settings
- + Color-coded line tabs
- + Dual toggle settings

### Cleaner Openings. Optimized Flight. Better Landings.

Fly With Unparalleled Stability, Efficiency and Power.

## 01 » 02 » 03 » 04 »

LARGER CAMBER    ROLLEDOVER NOSE    CROSSPORT DESIGN    CONTROL LINES

We designed the Lobo to deliver precision and power when you need it most, with a suite of technological enhancements that delivers remarkable advances in control, stability and flare power. The design integrates a larger camber, making the canopy more stable in slower flight; a rolled-over nose, which introduces innovations in skydiving and paragliding airfoils to optimize inflation (even during very slow flight); an optimized crossport design to optimize inflation; a redesigned upper control line configuration that noticeably boosts control and flare.
